Re: Archive Document Storage

To Whom It May Concern:

In my business we are required to keep a significant amount of documentation – much of it confidential in nature. After years in business we found that our storage requirements exceeded our available space and we needed a safe, secure place to store all of our document boxes. After researching a number of directions; it became obvious to us that Archive Document Storage was the most cost effective and convenient way to secure our historical files.

Daryl, of Archive Document Storage, was prompt and courteous and clearly explained to me the services they provide. He responded immediately to my request and, before I knew it, the issue was no longer an issue. I recommend Archive Document and Storage without hesitation.

Sincerely

Susie Parker
